Studio 50 System

Studio50 allows you to specifically design your work areas to suit the function of the room - this makes your office run far more efficiently.

Studio50 Screens are a simple, user friendly and versatile system. Studio panels allow you to create workzones, change layouts and provide visual, physical and acoustic barriers in your workspace.

Dimensions
600, 750, 900, 1200, 1500 or 1800mm Wide
1200mm High
500mm Above the desk
50mm Thick

Pinnable surface

Studio50's extruded polymer-resin foam Keeps work areas organised as well core is an ideal pinnable surface.

Your choice of fabric

The pinnable face of a Studio50 screen can be finished in the fabric of your choice - making it easy to add colour to your office space. The Freeway upholstery team recommends using either plain fabrics or large random patterns.

Sturdy work-surface brackets

The Studio50 desk brackets lock securely to the frame and can be placed at the height best suited to the user while remaining practically hidden from sight.

Multiple colour options

Each Studio50 panel can be covered in a different fabric, and by adding a transom to your screen you are able to have two colours.

Adjustable foot.

Studio50 stands on an adjustable levelling glide with 35mm travel allowing plenty of room to work on uneven floors.

Academy System

Designed and manufactured in our Newcastle factory this product is exclusive to Experienced Office Furniture. Available in various sizes and finishes this product is revolutionary in its design and function. A great way to provide a private, interactive office environment.

Affinity in desk boxes

Affinity Plus Indesk power and communications centre is an effective way of supplying power and communications connections within the workstation, boardroom, meeting tables or conference.

Affinity Plus offers the convenience of power and data when you need it and an uncluttered work surface when you don't. It is a concealed unit that can function in the open or closed position.

Executive in desk boxes

Executive in desk power and communications centre is an effective way of supplying power and communications connections within the workstation, boardroom, conference or meeting tables. It enables all services to be connected within the work surface with easy access to power and data through the stylish anodised aluminium lid & brush strips.

KonexUS Module

The CMS KonexUS is a stylish in-desk power and data centre that has been designed to fit any desk. Its discreet and modern appeal is ideal to fit with any work space design for the individual or breakout rooms that allow collaborators to access power and data points.

KonexUS comes with 3 choices of removable covers to suit keystone jacks. This solution can accommodate keystone jacks for data, USB and HDMI.

Flip box

Flip box is a unique slimline Indesk power & communications providing an effective solution to the desktop, meeting or training/conference table. Each of the power outlets has its own retractable cover; so when the outlet is not in use the spring loaded lid covers the socket.

Under carriage

CMS Undercarriage in-desk power and communications centre is an effective way of supplying power and communications connections within the workstation, boardroom, conference or meeting tables and allows the installer to attach their own lid to suit its surroundings.

Softwiring Power Modules, Data & AV

CMS Electracom supply a large range of Softwiring power modules, Data and AV solutions. All CMS softwiring solutions adhere to strict Australian standards.

Floor boxes

The CMS range of floor boxes allows you to install power, audio, video, telecommunications, and data ports all in one location. CMS Electracom in-house design team provide custom solutions to all projects.

CMS Floor boxes blend seamlessly into any environment to suit the aesthetics of the space and engineered to perform. Our team of dedicated professionals are trained to work with you in delivering the right wiring and power solution within time and budget.

CMS Electracom manufactures all their wiring and power products under strict quality standards in their state of the art manufacturing plant in Victoria, Australia.

CPU Holder

Slimline vertical slide & rotate metal CPU holder. Available in anodised/black combination.

The CPU holder effectively raise the CPU tower off the floor and stores it in a safe position under the work surface. Click on PDF for more information.

Vertical slide & rotate metal CPU holder (slimline CPUs 75mm – 150mm wide). Available in Black (BK) Silver (SL) or White (WT).

CPU Sling Holder
Vertical slide and rotate metal CPU holder with straps. Available in Black only.
